

The background of the image is a dark, textured surface with a complex network of glowing red and blue lines, resembling a circuit board or a digital map. Various icons are scattered throughout, including a padlock, a gear, a magnifying glass, and a person silhouette. The text is centered and prominent.

DARK WEB MONITORING TOOLS YOU MUST KNOW

Dark Web Market & Forum Monitoring

- **Flashpoint** – Monitors dark web forums & markets.
- **DarkOwl** – Large darknet content database.
- **KELA** – Cybercrime intelligence platform.
- **SOCRadar** – Dark web & cyber threat monitoring.
- **Flare.io** – Dark web risk intelligence.
- **SearchLight Cyber** – Criminal marketplace tracking.
- **Cyjax** – Dark web threat intelligence.
- **ShadowDragon** – Underground forum intelligence.
- **Anomali ThreatStream** – Threat feed aggregation.
- **Terbium Labs** – Credential leak monitoring.

OSINT Tools Supporting Dark Web Monitoring

- **Maltego** – Maps leaked identities & darknet links.
- **SpiderFoot** – Automated OSINT incl. dark web.
- **Recon-NG** – Dark web recon modules.
- **OSINT Framework** – Gateway to dark web tools.
- **Hunchly** – Evidence collection from Tor sites.
- **Metagoofil** – Finds leaked documents.
- **FOCA** – Metadata + document leak detection.
- **DataSploit** – Breach & OSINT aggregation.
- **BlackBird OSINT** – Identity exposure detection.
- **Harpoon** – Email intelligence & exposure.

Research, Academic & Open-Source Tools

- **Tor Flow Analyzer** – Tor traffic research.
- **OnionScan** – Scans onion services for exposure.
- **OnionShare Monitor** – Tracks shared content leaks.
- **Tor Metrics** – Tor usage & network analysis.
- **Darknet Diaries OSINT Resources** – Case-study research.
- **The Hidden Wiki (monitoring)** – Index of onion services.
- **TorBot Frameworks** – Automated crawling tools.
- **Dark Web Scraper Scripts** – Custom data collection.
- **Open Threat Exchange (OTX)** – Community threat intel.
- **AlienVault OTX** – Dark web indicators.

Dark Web Intelligence APIs & Feeds

- **IntelX API – Dark web search API.**
- **DarkOwl API – Programmatic darknet access.**
- **Flashpoint API – Threat data feeds.**
- **Recorded Future API – Automated threat intel.**
- **SpyCloud API – Credential exposure feed.**
- **SOCRadar API – Dark web intelligence feed.**
- **Anomali API – Threat intelligence automation.**
- **CIRCL Passive DNS – Darknet domain research.**
- **Open Threat Feeds – Community darknet feeds.**
- **MISP – Threat intel sharing platform.**

Automated Dark Web Monitoring Platforms

- ZeroFox Dark Web – Automated underground monitoring.
- ReliaQuest GreyMatter – Threat correlation platform.
- Rapid7 InsightIDR – Credential exposure alerts.
- IBM X-Force Exchange – Threat intel sharing.
- Palo Alto AutoFocus – Dark web threat analysis.
- CrowdStrike Falcon Intelligence – Adversary tracking.
- Cisco Talos – Underground threat research.
- ThreatConnect – Dark web intelligence automation.
- LogRhythm Threat Intelligence – SOC-focused monitoring.
- OpenCTI – Open-source threat intelligence platform.

Dark Web Search & Indexing Tools

- **Intelligence X** – Searches dark web, deep web & leaks.
- **DarkSearch** – Dark web search engine for onion sites.
- **Ahmia** – Tor search engine with abuse filtering.
- **Torch** – Classic dark web search engine.
- **Haystak** – Privacy-focused Tor search engine.
- **OnionSearch** – CLI dark web search tool.
- **DeepSearch** – Aggregates hidden services.
- **Phobos Search** – Darknet indexing engine.
- **ReconFTW Dark Modules** – Dark web recon automation.
- **TorBot** – Crawls Tor pages for intelligence.

Identity & Credential Protection Tools

- **Have I Been Sold** – Checks if data is sold online.
- **Identity Guard** – Dark web identity alerts.
- **Aura** – Personal dark web monitoring.
- **LifeLock** – Identity theft alerts.
- **IDShield** – Dark web exposure monitoring.
- **Breach Secure Now** – Business breach alerts.
- **MyPwd** – Password exposure monitoring.
- **Password Ping** – Credential leak alerts.
- **Avast BreachGuard** – Personal data exposure checks.
- **Firefox Monitor** – Breach notifications.

Awareness, Monitoring & Alerting Tools

- **Dark Web Alert** – Exposure notification service.
- **Have I Been Leaked** – Data exposure awareness.
- **Leak Monitor** – Continuous breach tracking.
- **Dark Web Watchdog** – Threat alerting tool.
- **Cyber Vigilance Tools** – Underground monitoring.
- **Shadow IT Watch** – Exposure alerts.
- **ThreatCrowd** – Intelligence correlation.
- **AbuseIPDB** – Malicious activity context.
- **URLHaus** – Malware & dark web links.
- **Cybercrime Tracker** – Tracks underground threats.

Data Breach & Leak Monitoring Tools

- **Have I Been Pwned** – Checks leaked emails/passwords.
- **Dehashed** – Searches breached credentials & data.
- **LeakCheck.io** – Dark web breach monitoring.
- **Snusbase** – Breach & leaked database search.
- **BreachDirectory** – Email/phone leak detection.
- **GhostProject** – Password & email leak lookup.
- **WeLeakInfo (legacy)** – Credential breach database.
- **Scylla.sh** – Search leaked credentials.
- **LeakPeek** – Quick breach intelligence.
- **IntelBase** – Underground data indexing

Email, Domain & Brand Monitoring

- **Constella Intelligence – Digital identity threat intel.**
- **CybelAngel – Brand & data exposure monitoring.**
- **Digital Shadows – Dark web & brand threat monitoring.**
- **ZeroFox – Brand impersonation & dark web threats.**
- **RiskIQ (Microsoft Defender TI) – Domain & threat intel.**
- **Recorded Future – Enterprise threat intelligence.**
- **SpyCloud – Stolen identity & credential monitoring.**
- **Outpost24 Dark Web – Credential exposure alerts.**
- **Have I Been Sold – Marketplace data exposure.**
- **Brandefense – Dark web brand protection.**
